Notes & Details

This Regency 8" gooseneck spout is perfect for use as a replacement, or you can use it to change the style of an existing faucet. It measures 12" high with an 8" length, and has a 2 GPM aerator to provide a gentle flow pattern with minimal splashing. Since it features a swing design, you can easily move it out of the way when washing larger cooking vessels, or move it to fill multi-bowl sinks. It attaches to the faucet base with a 1/2" NPS connection and is designed for use on Regency faucets as a replacement or an upgrade.
