- Lever handle design

Certifications

Technical Data

Mounting Type	Adjustable
Pre Rinse Unit Type	Hose and Spring
Spray Valve Flow Rate	1.15 GPM
Temperature Rating	140 Degrees F
Water Inlet Size	1/2 Inches

Notes & Details

This Regency 1.15 GPM deck mount pre-rinse faucet is an excellent choice when you need a reliable, affordable way to pre-rinse dishes and glassware before washing! Designed to be easy to install and easy to maintain, it's easy to see why Regency faucets are a great solution for any business. Thanks to its 44" long stainless steel flex hose, this pre-rinse provides the flexibility needed to quickly fill up a sink or hose off a big stock pot with ease, while the 1.15 GPM spray valve provides the power to blast away even stubborn dirt and debris and get dinnerware ready for washing. The spray valve comes with a hold-down ring, so that your staff can lock the valve in the open position without having to hold it in over long periods of time. This reduces operator fatigue and improves comfort, especially over long shifts.

With the 14" add-on faucet, you can also use your pre-rinse like a normal faucet too! The swing design delivers water exactly where you need it, and the moveable design lets you adjust it to fill multi-compartment sinks or maneuver around larger cooking vessels. It's also a great option for hand-washing, too! The faucet installs on your sink deck or countertop on a pair of 8" centers and connects to the facility water lines with a set of 1/2" NPT inlets. The faucet body is made from chrome-plated brass that complements nearly any design aesthetic, and the water flow is controlled by a pair of simple lever handles, with a single handle for the add-on faucet.
