## Notes & Details

This Regency 1.15 GPM deck mount pre-rinse faucet is an excellent choice when you need a reliable, affordable way to pre-rinse dishes and glassware before washing! Designed to be easy to install and easy to maintain, it's easy to see why Regency faucets are a great solution for any business. Thanks to its 44" long stainless steel flex hose, this pre-rinse provides the flexibility needed to quickly fill up a sink or hose off a big stock pot with ease, while the 1.15 GPM spray valve provides the power to blast away even stubborn dirt and debris and get dinnerware ready for washing. The spray valve comes with a hold-down ring, so that your staff can lock the valve in the open position without having to hold it in over long periods of time. This reduces operator fatigue and improves comfort, especially over long shifts.

The faucet installs on your sink deck or countertop with 8" centers and a set of 1/2" NPT inlets that connect to the facility water lines. The faucet body is made from chrome-plated brass that complements nearly any design aesthetic, and the water flow is controlled by a pair of simple lever handles.
