Notes & Details

Rinse leftover crumbs, sauce, and other soils off of your dishes before washing them with the Regency wall mount pre-rinse faucet! This low-lead faucet is intended for applications that provide water for drinking, cooking, warewashing, and janitorial or utility use. It includes a 1.15 GPM spray valve connected to a 44" long hose for powerful water flow and easy maneuvering. Additionally, its 8" centers feature 1/2" NPT connections for fast and easy installation.

For convenient, out-of-the-way storage, the included finger hook grips your spray valve's head when it's not in use to prevent it from interfering with the flow of your kitchen. The 12" add-on faucet features a swivel design to easily move it from side to side, letting you pour water into containers or fill your sinks without the use of the spray valve. Plus, thanks to the reliable 6" wall bracket, you can be sure this faucet will stay securely in place at all times.
