Notes & Details

This Regency FTPD foot pedal valve is a direct replacement for the valve that came with your Regency hands-free handwashing sink. By placing it near your sink, this foot pedal valve will allow you to turn the sink water on and off without using your hands. Not only does it help prevent the spread of unwanted germs, it helps you avoid the dispersion of dangerous bacteria.

This valve is incredibly easy to install. The screw on the side allows you to adjust the temperature of the water fed to your faucet, so you can have water as cold or hot as you wish. A necessity in any restaurant or catering kitchen, this foot pedal valve is simple to use. Keep your foodservice or healthcare environment clean and sanitary with this foot pedal valve!
