## Notes & Details

This Regency wall mount faucet with 18" double-jointed spout is an excellent choice when you need a reliable, affordable water fixture for your facility! Designed to be easy to install and easy to maintain, it's easy to see why Regency faucets are a great solution for any business. Thanks to a 18" long double-jointed spout, this faucet delivers water exactly where you need it, and the hinged design gives maximum flexibility to fill multi-compartment sinks, while also letting you fold it out of the way when it's not being used. This is especially useful when you need to wash large and bulky cooking vessels. Water exits the faucet through a 2 GPM aerator, which creates a soft flow pattern with minimal splashing. This faucet is designed for use in janitorial and dishwashing applications only, and is not intended for applications where the fixture will be used to supply drinking water, or water for cooking.

The faucet installs on your wall or sink backsplash on a pair of 4" centers and connects to the facility water lines with a set of 1/2" NPS inlets. The faucet body is made from chrome-plated brass that complements nearly any design aesthetic, and the water flow is controlled by a pair of simple lever handles.
