Spout Connection Size	1"-20 UNEF
Spout Type	Gooseneck
Temperature Rating	40 - 140 Degrees F
Type	Faucets
Water Inlet Size	1/2 Inches

Notes & Details

Perfect for busy commercial kitchens, this Regency wall-mount faucet with 3 1/2" swivel gooseneck spout is an excellent choice when you need a reliable, affordable water fixture for your facility! Thanks to a 3 1/2" long and 8" tall swivel gooseneck spout, this faucet delivers water exactly where you need it. The design provides maximum flexibility for washing your hands or filling pots and pans, and it can be folded out of the way when not in use.

Water exits the faucet with a 1.2 GPM flow rate, which creates a soft flow pattern with minimal splashing. The faucet installs on your wall or sink backsplash on a pair of 4" centers and connects to the facility water lines with a set of 1/2" NPSM inlets. The faucet body is made from chrome-plated brass that complements nearly any design aesthetic, and the water flow is controlled by a pair of simple zinc handles. An installation kit is required for setup (sold separately).
