

Regency Wall Mount Handsink Faucet with 6" Gooseneck Spout and Knee Valve

#600KNEEVKIT

Technical Data

Spout Length	6 Inches
Spout Height	10 Inches
Cartridge Type	Compression
Faucet Centers	Single Inlet
Finish	Chrome
Flow Rate	2 GPM
Material	Brass
Maximum Water Temperature	140 Degrees F
Mounting Style	Wall Mounted
Spout Clearance	5 Inches
Spout Type	Gooseneck
Type	Wall Mount Spout
Valve Type	Single Knee Action
Water Inlet Size	1/2 Inches

Features

- 6" long x 10" tall gooseneck spout, 2 GPM flow rate
- Includes knee valve and mounting bracket for hands-free operation
- Single hole wall mounted base, 1/2" NPT female inlet
- 140 degree maximum water temperature

Certifications

NSF/ANSI 61 & 372

1/2" Water Connection

3/4" Water Connection

Notes & Details

This Regency 6" hands-free gooseneck faucet kit is a great way to make your hand washing station more sanitary and reduce the length of germs in your facility. Great for use in new installations, replacing an old hands-free unit, or simply upgrading a traditional sink setup to a hands-free one, this kit gives you all of the key components you need to install your new faucet and start using it.

The gooseneck spout is 10" tall with a 6" length to provide plenty of clearance for comfortable hand washing, and the durable, chrome-plated brass construction ensures longevity. The included knee valve and mounting bracket makes it easy to operate the water flow while also removing contact points where germs can length. And since the valve is activated using your knees, it is a great option for places where a hands-free sensor faucet might not be ideal.

The valve has 3/8" NPT female inlets to connect to your hot and cold water lines, and a 3/8" NPT female outlet to connect a water line (sold separately) to your faucet. The faucet has a single, 1/2" NPT female inlet.
