Notes & Details

This Regency deck-mounted pre-rinse faucet is perfect for rinsing excess food and sauces off of your dishes prior to running them through your commercial dish machine. A quality pre-rinse unit is vital to any dishroom, removing the heaviest food debris so that dishes come out clean and ready to use. Designed with a chrome-plated brass faucet body and ceramic cartridges, it's easy to see why Regency pre-rinses are a great solution for any business.

A 44" long flexible hose gives you plenty of reach to deliver water where you need it, letting you handle glassware and dinnerware, or bulky items like pots and pans. The spray valve delivers a flow rate of 1.15 GPM, giving you the power needed to blast away food debris while being easy on your water bill. This pre-rinse unit also comes with an 8" add-on faucet for times when you need a normal faucet instead of a spray valve. It is perfect for filling up sink compartments to complete your warewashing tasks. It's also great for mixing up cleaning solutions in sanitation pails.

This reliable faucet uses ceramic cartridges, which provide a much lower fail rate than the compression cartridges widely used in the industry. In this design, 2 ceramic discs fit together to create a watertight seal when closed, removing the need for a rubber seat washer, which is one of the most frequently replaced parts on a faucet. This is a deck-mounted faucet, and it comes with a single base that makes installation easy. The 1/2" NPS inlet connections, and a set of 20" flex hoses make it easy to connect it to your facility's water lines. This pre-rinse unit comes with an 18" riser and a 6" wall bracket to help secure the unit to the wall for added stability.
