Certifications

Technical Data

Material	Chrome-Plated Metal Epoxy-Coated
Type	Can Rack Shelves
Weight Capacity	600 lb.

Notes & Details

This Regency 24" x 48" roll under shelf kit with 5 can racks and 74" posts is sure to boost efficiency and help you maximize storage space in your restaurant, hospital, retirement community, or school! With 5 total can racks, this shelving unit can hold up to (60) #5 cans or (40) #10 cans in total and each 48" shelf can accommodate five can racks. Thanks to its clever FIFO design, this rack enables a first in, first out system of stock rotation to ensure that older items are always getting used before newer items. In the long run, this will save a lot of money on product going past expiration date and getting wasted, and overall makes for a more efficient kitchen operation.

In addition to the can racks, there is also enough space on the shelves to store other non-canned dry ingredients. Each of the 2 shelves has an impressive 600 lb. capacity and are made of durable chrome plated metal with an epoxy coating. This not only makes the shelves a durable and reliable addition to your commercial kitchen, but it also makes for easier cleaning. There is also plenty of space below the shelves for rolling carts and ingredient storage bins, providing another convenient space for storage and maximizing valuable space in the kitchen. The four NSF chrome posts are complete with adjustable leveling feet to accommodate uneven surfaces, while the epoxy frame provides extra stability to shelves. Additionally, the posts allow for shelves to be adjusted in 1" increments.
