Notes & Details

Store and display items at your bakery, produce stand, or gift shop using this Regency 24" x 36" chrome storage display basket! Designed to fit onto your shelving unit in place of a traditional flat shelf, this deep basket display provides ample storage for bulky items and the slanted sides show off your product better than a traditional basket. This storage display basket can also be used to store impulse items, overstock items for quick selling, or to store supplies for your staff.

This basket's open design combined with the ability to adjust it to different heights ensures proper ventilation and maximum air flow between and around your stored products. Featuring a drop front and sloped sides, this basket maximizes storage space and allows you to see and access all of your product. When combined with other Regency shelving posts and accessories, this shelf basket can hold up to 300 lb. of evenly distributed weight, making it ideal for storing bulk and heavy supplies. Plus, the high weight capacity helps the shelf basket accommodate business growth as storage needs evolve and product inventory expands. Each basket purchased comes with four pairs of split sleeves that are used to attach the basket to its compatible posts (sold separately).
