## Notes & Details

This Regency 24" x 36" chrome wire shelf kit with 4 can racks and 34" posts is sure to boost efficiency and help you maximize storage space in your restaurant, hospital, retirement community, or school! With 4 total can racks, this shelving unit can hold up to (48) #5 cans or (32) #10 cans in total and each 36" shelf can accommodate four can racks. Thanks to its clever FIFO design, this rack enables a first in, first out system of stock rotation to ensure that older items are always getting used before newer items. In the long run, this will save a lot of money on product going past expiration date and getting wasted, and overall makes for a more efficient kitchen operation.

In addition to the can racks, there is also enough space on the shelves to store other non-canned dry ingredients. Each of the 3 shelves can hold an impressive 600 lb. and are made of durable chrome plated metal with an epoxy coating. This not only makes the shelves a durable and reliable addition to your commercial kitchen, but it also makes for easier cleaning. The four NSF chrome posts are complete with adjustable leveling feet to accommodate uneven surfaces. Additionally, the posts allow for shelves to be adjusted in 1" increments.
