Notes & Details

This Regency 24" x 36" chrome wire shelf kit with 8 can racks is an ideal choice for restaurants, hospitals, retirement communities, schools, and other food service businesses that need to store large numbers of food cans! With 8 total can racks, this shelving unit can hold up to (96) #5 cans or (64) #10 cans in total. With a durable metal construction, each individual can racks is loaded from the top, and allows your staff to utilize a first in, first out system for stock rotation. With this system in place you will no longer have to worry about stock being pushed to the back and getting wasted because it surpasses its expiration date.

In addition to the can racks, there is also enough space on the shelves to store other non-canned dry ingredients. Each shelf can hold an impressive 600 lb. and is made of durable chrome plated metal with an epoxy coating. This not only makes the shelves ideal for the wear and tear of a commercial kitchen, it also makes for more simplified cleaning. The (4) knock down chrome posts are designed in two pieces that easily screw together in the middle without the use of any tools. This makes it easier than ever to take apart, transport, and set up this shelving unit.
