Usage

All Environments Dry Environments Kitchens Moist Environments Walk-Ins

## **Notes & Details**

This Regency 3-sided green epoxy frame for wire shelving racks adds extra stability to your shelving unit. The 3-sided design attaches to all four posts of your shelving unit to make sure that your storage unit is strong and secure, no matter how much you need to store. The green epoxy finish is ideal for moist storage environments like cold storerooms, walk-in refrigeration units, and dish rooms since it is rust resistant.

This shelving frame is especially well suited for dunnage racks, as it adds support and helps fortify the racks to accommodate their heavy loads. It's also perfect for standard shelving units when a shelf is skipped. A skipped shelf diminishes the unit's rigidity by focusing weight onto the posts, which increases the chance of buckling. When the frame is added into the open space, it helps to more evenly distribute weight and to enhance structural rigidity.
