Notes & Details

Dry and store sheet pans, trays, and other dining essentials with this Regency 24" x 36" green epoxy drying rack shelf kit! It features (4) 24" x 36" drying rack shelves with 3" slots, accommodating 10 sheet pans per shelf for a total of 40. The open design facilitates air flow between and around products to maximize the drying efficiency. The (4) 74" posts offer plenty of room for the shelves to be adjusted using split sleeves, allowing you to easily customize your unit to meet your unique requirements.

The shelves and posts each boast a green epoxy coating that is exceptionally corrosion resistant, allowing them to be used for drying pans and trays in warewashing areas without fear of rusting. Perfect for restaurants, schools, and commercial kitchens, this shelf is incredibly simple to assemble. Plus, since it is equally as easy to disassemble, it is perfect for catering companies to quickly set up and later tear down. This shelf kit ships knocked down to provide you with savings on shipping fees.
