Notes & Details

Keep your storage area organized with the Regency 24" NSF green epoxy triangle 4-shelf kit with 74" posts! Featuring an attractive green epoxy coating for added durability and damage resistance, this kit includes (4) 24" wire shelves and (3) 74" posts, which allow you to create a convenient storage solution for the corner of your janitorial closet, warehouse, or stock room.

With an open wire design, this shelving system facilitates proper airflow while remaining incredibly sturdy and durable. Whether you need to store bulk ingredients, prep tools, cleaning supplies, or even small industrial components, these spacious shelves give you plenty of room to store all of your essential supplies. Plus, each shelf has a capacity of 500 pounds. They're adjustable, too! Since the posts are marked in intervals and use a split sleeve system of assembly, the shelves are easy to move higher or lower along the posts. This is especially great for expanding businesses that may not have finalized their product offerings.

A set of 3 split sleeves is provided for each shelf. Likewise, a foot is provided for each post and must be used for proper installation. The shelving unit requires assembly.
