## Notes & Details

Keep your storage area organized with the commercial-grade Regency 30" x 60" NSF green epoxy shelf kit! This NSF green epoxy shelf kit includes (1) 30" x 60" wire shelf and (4) 8" posts, which allow you to create a convenient storage solution for your janitorial closet, warehouse, or walk-in cooler. Incredibly easy to install, this kit can be quickly assembled once it arrives so that you can begin using it immediately! For maximum versatility, the green epoxy coating allows for use in either dry or moist environments, making the unit a commercial-grade, multipurpose investment that's sure to accommodate your ever-evolving needs.

The shelf features a wire construction, which allows for proper air flow around the stored supplies, products, or ingredients. It's adjustable, too; since the posts are marked in intervals and use a split sleeve system of assembly, the shelf is easy to move higher or lower along the posts. This is especially great for expanding businesses that may not have finalized their product offerings.

A set of 4 split sleeves is provided for the shelf, and the shelf accommodates up to 450 lb. of weight. Likewise, a foot is provided for each post and must be used for proper installation. The shelving unit requires assembly.
