Type	Shelving Kits Walk-In Shelving Kits
Usage	All Environments Dry Environments Kitchens Moist Environments Walk-Ins

Notes & Details

This Regency walk-in shelving kit is a great way to quickly and easily outfit a larger space with shelving, such as a 6' x 6' walk-in unit. This unit's wire shelf design allows proper airflow inside your walk-in, which in turn keeps temperatures even and ensures that products stay within safe holding temperatures. The shelves are adjustable too; the posts are marked in intervals and use a split sleeve assembly system, letting you move the shelves up or down if inventory needs changing. The 60" shelves can hold up to 450 lb. while all other shelves in the kit can hold up to 600 lb. of evenly distributed weight.

A durable, green epoxy coating over the posts and shelves gives your system the durability needed to stand up to frequent loading and unloading, while also providing the corrosion resistance that's essential inside a walk-in. This high quality, commercial-grade kit contains all of the hardware needed to install your shelving and to connect each section for stability, including the shelves, posts, and S-hooks. It ships unassembled.

Kit Includes:

- (8) 18" x 36" NSF green epoxy wire shelves
- (4) 24" x 60" NSF green epoxy wire shelves
- (8) 64" posts
- (16) S-hooks
