Notes & Details

Your Regency CANRK162 aluminum can rack needs a firm base to keep it steady and provide support, so if you notice that one of the feet on your rack is damaged or not working properly use this replacement foot to fix it! Your can rack is built to stand up to any commercial setting, but repeated impact over time could damage the feet on the can rack, and if it grows unstable it could tip over and become a major safety hazard - not to mention the potential for damaging cans and rendering them unusable. So protect your employees and your stock by inspecting the can rack regularly, and if you notice that it needs a new foot, replace it promptly!
