Notes & Details

Hold and transport a wide variety of your most popular baked goods with the Regency 20 pan end load nesting bun pan rack. This item uses a z-shaped nesting aluminum frame to provide users with a valuable space-saving design that's perfect for storage areas and kitchens with limited room. When not use, the racks can be pushed into one another, rather than having to position them side by side, ensuring the extra space can remain available for storage, prep work, or even allowing your staff to move freely throughout the area. The sheet pan rack can accommodate up to 20 full size sheet pans or 40 half size sheet pans, with an overall evenly distributed holding capacity of 795 lb. Integrated rail-type ledges are spaced at 3" intervals and not only offer sturdy support, but ensure safe and easy transport of your pans.

The rack is mounted on four 5" casters, including two with brakes, for effortless mobility throughout any commercial kitchen or bakery. This item comes unassembled in order to ship quick and provide the best possible savings on shipping costs. Instructions are included for assembly upon unpacking.
