Notes & Details

Hold and transport a variety of your most popular baked goods with the Regency bun / sheet pan rack! This durable rack will save precious space for your catering business, bakery, cafe, supermarket, or restaurant. This rack provides chefs with the ability to store multiple sheet pans in one convenient location and also facilitates proper cooling of your freshly baked treats. Additionally, this rack works well for storing trays of food at hospitals, cafeterias, or health care facilities.

The included work surface allows users to prepare a variety of food without the need to purchase another table or use valuable floor space. This half size rack can hold 16 full size sheet pans or 32 half size sheet pans. Each set of slides are spaced 1 1/2" apart, which means there will be plenty of room for your treats to cool properly. This generous spacing also gives you the ability to store foods that are not completely flat.

This space-saving sheet pan rack has an end load design and also features 2 locking and 2 non-locking 5" swivel casters. These rubber casters are quiet, will not damage your floors, and make transportation a breeze. The tough aluminum construction provides the ultimate in sheet pan storage and transportation. The whole rack ships unassembled so you save on shipping costs.
