Notes & Details

As part of the Regency Space Solutions' wire shelving collection, this 14" x 60" green epoxy coated wire shelf is great for use in all environments, including dry storage, refrigerators, freezers, and ware washing areas. It's made of a durable, zinc plated metal, with a green epoxy coating. Plus, its high-quality design is commercial grade and delivers the reliable performance every business expects and needs.

When combined with additional shelves, posts, and accessories (sold separately), this Regency green epoxy-coated wire shelf is capable of holding up to an impressive 450 lb. of evenly distributed weight. This shelf's ribs run from front to back, rather than left to right, for easy loading and unloading of canned goods and other items. Its vented design enables proper air circulation, so it won't collect dust as quickly. Each shelf purchased comes with four pairs of split sleeves that are used to attach the shelf to its compatible posts (sold separately).
