Notes & Details

Complete your commercial kitchen's prep area with this Regency Spec Line 30" x 96" stainless steel work table with 2 sinks! This Regency work table with sink features a type 304 stainless steel construction, which offers greater durability and corrosion resistance than type 430 stainless steel options, making it the ideal choice for your kitchen! With its 2 integrated 16" x 20" sinks on the left side of your unit, including an 8" deep sink and a 4" deep sink, this table allows you to easily rinse ingredients or wash your hands as you are completing other tasks on the table's large work surface. Plus, its undershelf offers a convenient storage solution so you can keep everything you need close at hand for a streamlined operation.

With a 14 gauge type 304 stainless steel top, this work table offers superior corrosion resistance and durability and the ability to hold up to 680 lb. Plus, the stainless steel material is easy to maintain and can be wiped clean at the end of the day. With its 8" deep sink, this unit makes kitchen duties like food prep and dishwashing a breeze! The sink features a deck-mounted faucet with a 12" swing spout and 4" centers over the 4" deep sink to provide excellent clearance and ensure dependable service for your establishment. It has an 18 gauge type 430 stainless steel undershelf for additional storage with a capacity of 480 lb.

A 10" backsplash protects your walls from splashes and spills while also preventing items from falling behind the table. Supported by stainless steel legs, hat channels, and sockets, this unit provides a solid foundation and long-lasting reliability. Attached to the legs are the stainless steel bullet feet to ensure leveling and stability on uneven floors. The included strainer basket helps collect excess waste particles in the sink to eliminate the possibility of clogging, while the included stainless steel self-closing drawer easily mounts to the hat channels under the work table. This drawer is quieter and easier to close, and it has a built-in lock, allowing you to secure the drawer's contents with ease for added security.
