Notes & Details

Keep a variety of beers chilled and within reach for your customers with this Regency 24" x 60" stainless steel beer box! Once filled with ice, the 18" deep cavity holds up to 13 cases of beer bottles to maintain them at a temperature that's perfect for serving. It also includes a 304 stainless steel sliding lid to slow ice melt without slowing down service at your bar! And since the lid features a lock and keys, you can also secure the box's contents easily. The box features a perforated false bottom that allows melted ice to drain, ensuring that water won't sit in the bottom of the container and leave the bottles wet. A 1" I.D. drain pipe with 1 1/4" connection and 1" tailpiece safely drains melted ice water from the unit so you're only left with solid pieces.

Designed for exceptional durability and long-lasting use at your restaurant or bar, this beer box also has a 3" backsplash to protect the wall and help maintain a sleek, professional appearance. This unit features a mostly stainless steel construction, including an 18 gauge, type 304 stainless steel bowl, top, bottom, backsplash, and apron. 16 gauge type 304 stainless steel is used on the perforated false bottom, and galvanized steel on the legs and sockets, and leg bracing. Plastic bullet feet make it easy to level the bin and account for slight floor grading. Keep your customers happy with ice-cold beverages at the ready with this Regency beer box. It's ideal for a drink-serving station and high volume service at your cantina or fast casual restaurant.
