Notes & Details

The Regency 20" beer drip tray is the perfect addition to your bar service area! It is ideal for placing under beer taps and makes for a great spot to temporarily sit a drink after it is poured so that any overflow is caught and collected. This rail is designed to be surface mounted beneath beer or other beverage taps.

The built in sprayer will quickly spray a stream of water into glasses which will rinse them out and also make the inside of the glass wet for a cleaner pour. Made of 18 gauge type 304 stainless steel, you can expect a tough and durable composition as well as the benefit of being non-corrosive. The top grate features draining slots and is removable for easy cleaning and maintenance. A brass 3 1/2" x 5/8"-18 threaded drain allows any liquids to flow out of the rail, preventing overflows on the floor or counter.
