Notes & Details

Enhance staff efficiency and productivity when preparing specialty drinks with the Regency 12" x 23" stainless steel blender station with dump sink and faucet. This unit combines a recessed step, a 9" x 9" x 4" dump sink, and a faucet with an 6" swing spout for unparalleled convenience. The stainless steel step features a 1 1/2" grommet hole for blender power cords. It also exhibits a 3" backsplash that protects nearby walls and floors, minimizing messes. Additionally, its 1" IPS drain makes it easy to dispose of old beverages. This station has everything you need to facilitate blending drinks, dumping liquids, and rinsing drinkware.

The faucet boasts a lever handle design that makes it easy to control the flow and temperature of the water, reaching a maximum heat of 140 degrees Fahrenheit. Water exits the faucet through a 2 GPM aerator, which creates a soft flow pattern with minimal splashing. The faucet is secured on the standing base via a pair of 4" centers, and it connects to the facility water lines with a set of 1/2" NPT inlets. The faucet body is made from chrome-plated brass that complements the station's stainless steel blender shelf, sink, and leg gussets. The unit's galvanized steel legs have plastic bullet feet that will preserve your floors. This blender station is a must-have for any bar, restaurant, or smoothie shop!
