Tabletop Material	Stainless Steel
Top Capacity	800 lb.
Top Material	Stainless Steel
Type	Equipment Stands
Undershelf Capacity	620 lb.
Undershelf Construction	Galvanized Steel
Usage	Standard Duty

Notes & Details

This Regency 30" x 30" 16-gauge 304 stainless steel equipment stand with undershelf provides additional work space in your busy kitchen. Great for holding countertop equipment, it's constructed from 16-gauge, 304 series stainless steel which offers greater durability and corrosion resistance than type 430 stainless steel. It has a smooth, easy-to-clean surface which makes this equipment stand an ideal addition to your establishment. With the ability to hold up to 800 lb. of evenly distributed weight on the top shelf and 620 lb. on the undershelf, this equipment stand provides additional storage options in crowded kitchens or tight work spaces.

The adjustable, galvanized steel undershelf should be placed 6" off of the ground when used in food service applications to comply with food safety regulations. Plus, a working height of 24" allows you to create a comfortable work station for your employees. For increased stability, the legs of this work table are 1 5/8" in diameter and are also made of tubular galvanized steel, with casters to make your table fully mobile. With brakes on 2 of the casters, you can make sure the unit does not move when you don't want it to. If you wish for the unit to not be mobile, 4 additional legs come with this table with adjustable plastic feet, instead of casters.
