Top Material	Stainless Steel
Type	Equipment Stands
Undershelf Construction	Galvanized Steel
Usage	Standard Duty

Notes & Details

This Regency 30" x 36" stainless steel equipment stand with 10" wooden adjustable cutting board is built to stand up to daily use in even the busiest commercial kitchens. Great for holding countertop equipment, this stand provides additional space in your kitchen to maintain a clean and organized environment. Featuring a durable 16 gauge stainless steel top that can support up to 800 lb. of evenly distributed weight, it's the perfect solution to increasing work space.

The wooden adjustable cutting board provides a convenient surface for placing ingredients or assembling sides, and is perfect for chopping, slicing, dicing, and even carving. It adds versatility to your equipment stand to maximize space. Plus, because it's made of 1 1/4" thick hardwood, it's sturdy and long-lasting and won't dull knives. Two stainless steel, curved legs attach the board to your 36" long equipment stand, and two stainless steel welded sockets hold it in place. This method of installation allows the work surface to easily adjust in height; just raise or lower where the sockets screw onto the equipment stand.

When mounted onto the supports of the 10" x 36" equipment stand cutting board, the 10" x 36" stainless steel plate shelf provides extra storage space for plates, utensils, and other commonly used items that you want to keep close to your work area. It is made from stainless steel to provide durability in fast-paced kitchens, and has a backsplash to keep items from falling off of the shelf. The galvanized steel undershelf with hat channel provides additional storage for supplies and can hold 620 lb. A 2" high edging comes standard to help contain equipment and contents for added safety. For added stability, this unit stands on sturdy galvanized steel legs with bullet feet.
