Features	Bottle Storage Lid Included NSF Listed With Backsplash
Gauge	20 Gauge
Installation Type	Freestanding
Insulation Material	Foam
Leg Construction	Galvanized Steel
Lid Type	Sliding
Material	Stainless Steel
Number of Cold Plate Circuits	7 Circuits
Type	Ice Bins With Cold Plate

Notes & Details

Ensure you have a steady supply of cold beverages at your bar thanks to this Regency 21" x 24" underbar ice bin with 7 circuit post-mix cold plate. Whether you're serving up a delicious cocktail or a refreshing soda, this unit makes the most of space behind your bar. Thanks to this unit's versatility, it's easy to store and chill everything you need to create the perfect gin and tonic, whiskey ginger, cranberry vodka, and other popular drinks at your busy bar, nightclub, or restaurant. It comes with a sliding lid to enhance safety and sanitation while improving the quality of your ice. Since many municipalities require that underbars have a cover, this lid will help you stay in compliance.

With its 51 lb. ice capacity, this bin holds plenty of ice to keep your operation going, customer after customer. The 15 3/16" x 22" interior bowl holds ice, while 2 plastic bottle holders with removable dividers let you simultaneously chill your most popular liquors and mixers. Additionally, it boasts an attractive 20 gauge stainless steel construction that looks great at your bar or pub, and it's easy to keep clean. Stainless steel is also an excellent material for retaining cold temperatures, making it perfect for ice storage.

This ice bin features 7 stainless steel, beverage-grade 1/3" O.D. tubing circuits that run your soda through the icy unit to ensure colder, more refreshing beverages! A 5/8" I.D. drain pipe safely drains melted ice water from the unit so you're only left with solid pieces. The poly foam insulation helps keep this ice bin's contents cool, saving you money by wasting less ice, and to keep your bar protected from potential water damage, this ice bin is built with a 3" backsplash. Additionally, the lid is made of 18 gauge type 304 stainless steel for exceptional durability and corrosion resistance as well as better cold retention, and thanks to its front-to-back sliding design, it's easy to open and close. The galvanized steel legs offer superior stability and further protection against corrosive substances, while the adjustable plastic bullet feet allow you to level your bin on uneven surfaces for the best possible stability.
