Notes & Details

Effectively store liquor bottles within convenient reach of the bartender while creating a unique display for customers with this Regency 18" wide liquor display rack! At 26" deep, this rack accommodates approximately 20 liquor bottles and, thanks to the stepped five-tiered design, all bottles are clearly on display at all times within a compact 18" wide footprint. A 6" backsplash helps protect the walls and floor around the unit from accidental splashes and spills, while a 2" wide integrated bar on each tier helps hold bottles in place for added assurance.

Built for reliable, long-lasting performance, this Regency 18" liquor display rack features an 18 gauge type 304 stainless steel bottom, back, sides, hat channel, and steps. That not only makes for a durable addition to your bar setup, but also one that is extremely simple to clean! The galvanized legs with stainless steel sockets provide added stability and rest upon plastic bullet feet.
