Type	Straight / Line Sinks

Notes & Details

Outfit your facility with a long-lasting sink with this Regency 81" three compartment stainless steel sink. It's constructed from high-quality, 16 gauge type 304 stainless steel, making it more corrosion-resistant and durable than other sinks made from thinner, 18 gauge material. This sink gives you the durability you need with a smaller profile than most other three compartment models, making it especially ideal for low-volume establishments or those with limited space.

Each bowl is 14" deep, allowing you to wash a variety of large items with ease. Plus, it includes (3) 1/2" basket strainers to catch food debris, which prevents the drain from clogging. For easy cleaning, the compartment has rounded corners so you can rinse and wipe down the sink.

A 10 3/4" tall backsplash is included with two sets of pre-cut holes on 8" centers to accommodate splash mount faucets (sold separately). This sink includes a rolled edge on the front and both sides to contain splashes and overflow. This model also has galvanized steel legs and adjustable plastic bullet feet to keep the sink level and stable. These features serve to prolong the life of your sink while adding exceptional strength to the unit.
