Features

- Direct replacement for standard foot
- Provides a flat, stable base in any environment
- Allows you to bolt equipment to the floor
- Great for food trucks or to comply with local codes
- 3 1/2" maximum diameter and adjustable height

Notes & Details

If you need to bolt your Regency equipment to the floor for added stability during use, this adjustable height flanged seismic foot is the perfect solution! Since it will directly replace a standard foot, you don't need to worry about making adjustments to the equipment in order to accommodate this foot.

Feet like this one are typically used to comply with local codes which require you to secure equipment to the floor. It is also very beneficial to use flanged feet in situations where keeping your equipment immobile could be useful, like on a food truck or other mobile foodservice operation!
