Notes & Details

This stainless steel commercial 18" x 48" work table with an undershelf is constructed from durable and easy-to-clean 18-gauge type 304 series stainless steel. Type 304 stainless steel offers greater corrosion resistance than type 430 stainless steel options, making it the ideal choice for your kitchen. This durable stainless steel work table offers additional space for preparation or other tasks and provides superior corrosion resistance for a long service life. This work table boasts an 18-gauge stainless steel 4" backsplash to match the top. This guard helps protect your walls and floors from accidental spills, and it also gives you that extra assurance that your blender, food processor, or any other small, light-weight piece of equipment won't fall off the back of the work surface.

This work table's adjustable undershelf is made of 18-gauge galvanized steel and is secured with set screws for easy assembly. With this undershelf, you'll have the space you need to store items like cutting boards and small counter equipment within easy reach. The legs of this work table are 1 5/8" in diameter and are made of tubular galvanized steel. They are equipped with adjustable plastic bullet feet that help level the table on uneven floors. This work table's durable top can hold approximately 650 lb. of evenly distributed weight, and the undershelf can hold approximately 480 lb. This table is not recommended for use with overselves.
