Notes & Details

This Regency 30" x 30" stainless steel commercial work table with casters is a great way to provide additional work space for your business. It features a 16-gauge stainless steel top, which provides plenty of space for food prep, packaging, and a wide range of other tasks. 304 series stainless steel is used in the worktop to provide greater durability and corrosion resistance over type 430 stainless steel.

An adjustable undershef made from 16-gauge, 430 series stainless steel provides additional storage and organization options under the worktop - use it to store commonly used items, appliances, or ingredients where you can access them easily. Just be sure to install it 6" off of the ground when used in food service applications to comply with food safety regulations. The legs of this work table are 1 5/8" in diameter and are made of stainless steel, with 5" casters to make it mobile. 2 casters come with brakes to lock it in place. The worktop can hold up to 550 lb. of evenly distributed weight, and the undershef can hold up to 330 lb.
