Notes & Details

This stainless steel commercial 24" x 18" equipment filler table with 1 1/2" backsplash is designed to help you maximize the space in your kitchen and make use of unused areas between equipment. The top shelf is made of durable and easy-to-clean 16-gauge type 304 stainless steel, which offers excellent durability and corrosion resistance compared to other types of stainless steel. And with a thin, 18" long footprint, this table easily fits between kitchen equipment to provide additional work space for food preparation, storage space for commonly-used supplies, and any other use that requires a stable work space in a narrow footprint!

The work table features an open base design, supported with aluminum corner brackets. A 1 1/2" high backsplash is included to help protect walls from splashes and to also keep items from falling off the table. The legs of this work table are 1 5/8" in diameter and feature adjustable plastic feet, allowing you to account for uneven floors and keep your work surface level. The legs and hat channels are made from corrosion-resistant 18-gauge galvanized steel. All installation hardware, including the necessary screws and Allen Wrench, are included.
