Notes & Details

This Regency 24" x 24" stainless steel commercial open base work table is a versatile addition to your kitchen. Made from durable, easy-to-clean 16-gauge 304-series stainless steel, this work table offers superior corrosion resistance and added durability over other work tables made of 18-gauge stainless steel. And due to its all-stainless steel construction, it can withstand a wide range of tasks in your restaurant, cafe, or bakery. It's a great option for rolling out dough or chopping fruits and vegetables, providing your staff with additional work space to complete tasks efficiently.

This table can hold up to 500 lb. of evenly distributed weight and features an open base that allows you to store tall items underneath the table. For increased stability, it includes stainless steel cross bracing with aluminum corner brackets. The legs of this work table are 1 5/8" in diameter and feature adjustable stainless steel feet, allowing you to account for uneven floors and keep your work surface level.
