Notes & Details

This Regency stainless steel mop sink cabinet is a great way to keep all your mopping supplies organized and ready to use when you need them. This unit includes a mop sink with a 38" x 16" x 6" bowl to provide a dedicated station for washing mops, filling containers, emptying mop buckets, and other janitorial needs. Since the sink is made from 16 gauge type 304 stainless steel, it provides excellent durability and corrosion resistance where it's needed most.

The cabinet features a fully welded, 18 gauge type 304 construction to ensure long-lasting use. Ventilation slits built into the front of the unit promote proper airflow. The interior of the cabinet also helps to keep you organized with a stainless steel storage shelf for keeping all of your gloves, cleaning products, and other commonly used supplies close at hand. Two rear-mounted mat holders, each with four hooks, allow you to conveniently wash and hang mats. The 22 gauge stainless steel doors feature a recessed handle, and a lock and key set is included to keep the cabinet's contents secure when not being used.
