

WOOD BED BASES

Our wood bed bases are made from high-quality MDF boards. The flush-to-floor design prevents dust and lost items from accumulating beneath the bed. Each panel is moisture sealed at the bottom to stop warping from carpet shampoos or spilled liquids. Three heavy-duty angle iron cross supports brace the bed base. Choose from three height options to select the preferred level of the bed. The warm cherry finish adds a stylish touch, and models are available to fit Twin/Twin XL, Full/Full XL, Queen, King, and California King box springs and mattresses. No tools are required for assembly.
