Type	Shelf Warmers Strip Warmers
Usage	Medium Duty

Notes & Details

Keep foods hot and ready to eat with this ServIt 36" stainless steel heated shelf warmer with lighted strip warmer! This buffet warmer comes with a versatile shelf warmer that's a must-have foodservice tool! It is perfect for holding food in buffet lines, self-serve stations, or even in pass-through areas where you're warming pizzas or a pan of chicken wings. It also comes with a 36" lighted strip warmer to help ensure your food is hot and ready to serve. The lighted strip warmers come with shatter-resistant incandescent lights that provide bright, high-quality lighting for any kitchen.

Durable and corrosion-resistant, the shelf warmer is constructed of 304 stainless steel, making it a long-lasting addition to your kitchen. It features 576W of power and is thermostatically controlled with gentle rope type elements, allowing you to set the temperature from 80 to 212 degrees Fahrenheit. It features adjustable rubber feet and a marine edge to prevent slippage. It is perfect for keeping your products warm and ready for your customers.

The strip warmer features thick insulation and an aluminum reflector to retain heat and direct it towards your shelf warmer. Its simple on / off toggle control allows for easy use, while its durable yet light weight aluminum housing prevents sagging. This sheathed heating element won't dry out your food, and its metal guards support the heating element without affecting heat distribution. It comes with (3) 40W light bulbs and provides 970W of heat!

Both units come with their own plug so you can begin using them right away! These units also come with mounting brackets to fit the two together. Each unit requires a 120V electrical connection for operation.
