Notes & Details

This Servit HLR45CH chrome ceiling mount heat lamp is the perfect way to highlight foods and create a vibrant display and holding area for your culinary creations! It features a 10 5/8" diameter round cone shade made from aluminum for superior durability, with a polished chrome finish to create a sleek, professional look while creating an inviting atmosphere to let your customers know you have delicious hot food ready to eat. A retractable cord is used to suspend the lamp from the ceiling, which allows you to adjust it to any length between 40 5/8" - 119 1/2" using the heavy-duty ratcheting system. 4" of bare wire is provided to hard-wire it to your building's electrical lines, and a hardware set with 4 3/8" finishing ring cover conceals the installation point and blends the lamp assembly in with the ceiling. The on / off switch is located on the shade so that employees can easily switch the lamp on and turn it off without hassle at the end of a shift.

Since it mounts on your ceiling, this lamp is ideal for creating permanent display areas to showcase foods like pizza by the slice, or it can be used on a buffet setup to help foods look their best. It comes with a 250W shatter-resistant bulb to generate the necessary heat and light, while the coating keeps any shards contained in the event of bulb breakage. This ensures that pieces of glass won't make their way into the food or scatter on the floor where they could potentially cause injury. It requires a 120V electrical connection and must be hard-wired.
