Notes & Details

Ensure hot and ready-to-serve food with this ServIt 18" strip warmer with single adjustable infinite control. This strip warmer features thick insulation and an aluminum reflector to retain heat and direct it towards your holding surface. Its adjustable infinite control ensures the perfect temperature for any food, while its durable yet light weight aluminum housing prevents sagging, making this the perfect choice for busy restaurants, cafeterias, or buffet lines.

This item provides 350 watts of heat and requires a 120V electrical connection for use. For your convenience, it comes with a cord and plug so you can begin using it right away! It includes mounting brackets for simple installation directly into overshelves, or it can be hung with support chains (sold separately). This sheathed heating element won't dry out your food, and its metal guards support the heating element without affecting heat distribution. Maintain ideal temperatures with ease with this strip warmer!
