Notes & Details

The powerful 1,800W Solwave Ameri-Series commercial microwave oven is packed with features to meet the needs of medium-duty food service operations, from fast casual and family restaurants to bars, grills, and schools! Five power levels plus the ability to program up to 100 different menu items combine with 2 magnetrons that each have a rotating antenna for even heating throughout the cavity to ensure that you enjoy even cooking and consistent food quality every time. This unit is also stackable, so you can add multiple units without sacrificing valuable countertop space.

This commercial microwave features a 1.2 cubic foot capacity, while the stainless steel exterior and interior with a sealed ceramic shelf and removable splatter shield enable easy cleanup. For simple and efficient operation, this unit features a unique ergonomic door handle that can be opened with one finger even when your hands are full! For simple maintenance, a removable air filter protects the oven components from grease-laden air, prolonging the unit's life, and a clean filter reminder even tells you when it's time to be cleaned! The integrated touch pad controls include an X2 quantity pad that allows you to set double-quantity cook time with just the press of a button, while the "on the fly" cooking feature lets you reset the timer without terminating the current cooking cycle. A 208/240V electrical connection is required for operation.
