

Ideal for heavier cartons

Our CS-Series of carton sealers are operator fed and designed for heavy duty applications. These machines are reliable, cost-effective and durable providing savings to your production process. More importantly, these machines provide a professional looking seal.

The CS-5050B Semi-Automatic Uniform Carton Sealer with Easy Manual Carton Size Adjustment has a 4-belt design (2 side and 2 top) which is ideal for heavier cartons. The machine comes complete with infeed / exit conveyors, casters, power cord and plug.

The operator simply folds the top flats of the corrugated carton and feeds it into the machine. The CS-5050B applies a single tape to both the top and bottom of the case simultaneously. The CS-5050B can be easily adjusted in only seconds to process a different size carton. Excellent for heavier boxes.

### Standard Features:

- Adjustable height of table
- Heavy duty frame
- Manually adjust height and width of machine for each box size
- Suitable for heavier cartons
- Operator feeds and folds flaps into machine
- Side Pressure Rollers to Close Box Top
