

Seal poly bags in one motion

- Heavy Duty Cast Aluminum Body
- Sealing Head Adjustable for Pitch for Operator Comfort
- Easily Replaceable Parts
- Heavy Weighted Base
- Trimmer for Clean Bag Appearance
- Rugged Chip Resistant Powder Coated Surface
- Made in Sweden

More Details:

Tightly seal poly bags in one quick motion.

Our newest addition to our bag sealer line, the ND-2333, tackles even the toughest job. This heavy duty bag sealer will seal any plastic or paper bag with a twisted neck diameter of up to .24" (6mm). Bags can be easily sealed at different angles. The ND-2333 has a 0.47" (12mm) throat size easily fitting the standard 3/8" PVC tape. Using these dispensers is a simple, economical way to close poly bags with vinyl packaging tape. They are capable of sealing 2,000 bags per house and use only 2" of tape per seal.

Dispensers are all heavy cast aluminum constructed with an inbuilt cutter and heavyweight base. Dispensers require no assembly or maintenance. Simply place PVC tape on the 3" core wheel and it is ready to use.

Easy to use.

Just twist the mouth of the poly bag and slide through the slot (throat) with a downward motion. The tape wraps around the bag neck instantly and the tape is trimmed automatically. The excess plastic bag can be cut off with a continuous downward motion passing through the trimmer.
