"Heat is the secret ingredient."

Harold McGee

The °Control Freak™ induction cooking system is the first of its kind to accurately measure, set and hold 221 cooking temperatures from 30°–250°C. The unique real-time sensing system uses a through-glass sensor to directly measure surface temperature. Probe Control™ remote thermometer to precisely control the temperature of both water and fat-based liquids.

The Intensity function gives incredible control over the heat up speed to the set temperature. Create function stores frequently used custom temperature profiles for simple one-touch recall.
