Hot Food, Perfect Fit

Finally, an elegant and efficient solution for keeping food hot and appetizing on square plates. Our new square Versa Camcovers® provide a perfect fit on the most popular square plate designs. Square covers provide secure stacking of plates during banquet service. Each cover is designed so that the foot of the plate nests securely on to the top of the plate cover below. This causes less movement during transport and service, making them safer for employees to handle.

Versa Camcovers are quieter than metal covers, making them an ideal option for banquets and catering. At half the cost of stainless, Versa Camcovers will not dent or scratch, and do not require polishing to retain their appearance. Non-porous material remains odor free and stain resistant.

- Withstands temperatures up to 300°F
- Safe for use in heated carts and microwave ovens
- Covers remain cool to the touch
- Dishwasher safe
