Notes & Details

This Waterloo wall-mounted faucet is the perfect solution when you need a dependable water fixture in your facility! Waterloo faucets provide the industry-leading quality you expect. With heavy-duty chrome-plated brass faucet bodies, ceramic cartridges engineered for durability, and certifications from a wide range of national and local regulatory agencies, you can install this model with confidence.

This faucet features a 12" long swing spout that moves easily around the sink bowl, while a 1.8 GPM aerator provides a consistent flow rate and minimal splashing. It boasts a set of 8" adjustable centers, while the deck-mounted design is easy to install with 1/2" NPT inlets. For convenient use and sanitary hand washing, this model comes with 4" blade style wrist handles. This type of handle lets employees turn the water on or off by using the wrist rather than the fingers, reducing the transfer of germs for increased sanitation.

This faucet uses quarter-turn ceramic cartridges, which provide a much lower fail rate than the compression cartridges widely used in the industry. In this design, 2 ceramic discs fit together to create a watertight seal when closed. This removes the need for a rubber seat washer, which is one of the most frequently replaced parts on a faucet.
