- Heavy-duty faucet base and spray valve, chrome-plated brass construction

### Certifications

 CSA, US and Canada

1/2" Water Connection

NSF Certified

### Technical Data

Hose Length	108 Inches
Faucet Width	12 3/8 Inches
Faucet Height	11 Inches
Add-On Faucet	8 Inches
Add-on Flow Rate	2 GPM
Add-On Type	Swing
Cartridge Type	Ceramic
Faucet Centers	8 Inches
Finish	Chrome
Handle Type	Lever

## Technical Data

Features	ASME A112.18.1-2018 / CSA B125.1-18 Massachusetts Accepted Plumbing Product NSF Certified
Material	Brass
Mounting Style	Wall Mounted
Mounting Type	Adjustable
Pre Rinse Unit Type	No Riser
Spout Connection Size	1"-20 UNEF
Spray Valve Flow Rate	2.6 GPM
Thread Type	NPT
Type	Faucets
Water Inlet Size	1/2 Inches

## Notes & Details

This Waterloo wall-mounted utility faucet is a versatile water fixture that can fill a wide range of roles in your business, thanks to its coiled, 9' hose and a reliable spray valve design! Waterloo products provide the industry-leading quality you expect. With heavy chrome-plated brass faucet bodies, ceramic cartridges engineered for durability, and certifications from a wide range of national and local regulatory agencies, you can install Waterloo products with confidence. And to give you total peace of mind, this model comes with a 3-year replacement warranty.

A 9' long hose makes it easy to get water exactly where you need it, when you need it, and the coiled design keeps it stowed out of the way when you don't need it. It's a great solution for pet and animal-grooming applications. Restaurants can also use it for easier equipment washdown, and it's great for plenty of other utility applications, too! The spray valve delivers a flow rate of 2.6 GPM, giving you the power needed to blast away debris while still being gentle enough for use on animals in grooming applications.

This unit also comes with an 8" add-on faucet, for times when you need a normal faucet instead of a spray valve. It is perfect for filling up sink compartments or washing small hand tools, and is also great for mixing up cleaning solutions in sanitation pails.

This faucet uses ceramic cartridges, which provide a much lower fail rate than the compression cartridges widely used in the industry. In this design, 2 ceramic discs fit together to create a watertight seal when closed. This removes the need for a rubber seat washer, which is one of the most frequently replaced parts on a faucet. This is a wall-mounted faucet, and it comes with 8" adjustable centers that line up with your sink or mounting surface centers to make installation easy. A set of 1/2" NPT inlets make it easy to connect it to your facility's water lines. Due to flow rate regulations, this faucet cannot be used in a pre-rinse application for pre-scraping dinnerware.
