Notes & Details

This Waterloo countertop glass filler is the perfect solution when you need a dedicated area for filling cups with fresh, clean drinking water! Designed with a 6" swing nozzle, this glass filler combines functionality with style. Providing 8" of clearance, it boasts plenty of room to accommodate all kinds of glassware, while its deck-mounted design and single hole base make it easy to install. With a dedicated glass filler, you can also give your waitstaff more flexibility by placing it in the most convenient location for your workflow.

An intuitive and familiar lever design makes it easy to use, too - just push the cup back against the lever and it will dispense from the nozzle. It's a great way to improve workflow and ensure all of your customers get a glass of clean, refreshing water. Plus, this glass filler features a lever handle connected to a swing spout for an additional way to dispense water. It installs using a 1/2" NPT male inlet. It requires a 7/8" round hole for installation and works on countertops up to 2" thick.
