

Waterloo 1.15 GPM Deck-Mounted Pre-Rinse Faucet with Single Base and 12" Add-On Faucet

#750PRD12

Item #: 750PRD12 Qty: _____
 Project: _____
 Approval: _____ Date: _____

Features

- 44" hose, 1.15 GPM spray valve
- Deck-mounted design with single base, 1/2" NPT inlets, 20" water lines included
- 1/4 turn ceramic cartridges for long life and leak-protection, check valves prevent backflow
- Heavy-duty faucet base and spray valve, chrome-plated brass construction
- 12" add-on faucet (2 GPM), 18" riser

Certifications

 CSA, US and Canada
  NSF Listed
  1/2" Water Connection

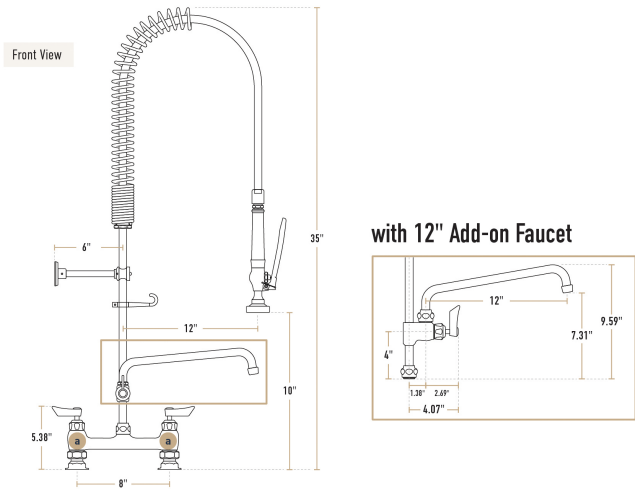

Technical Data

Hose Length	44 Inches
Faucet Height	35 Inches
Add-On Faucet	12 Inches
Add-on Flow Rate	2 GPM
Add-On Type	Swing
Cartridge Type	Ceramic
Faucet Centers	Single
Finish	Chrome
Handle Type	Lever
Material	Brass

Technical Data

Features	ASME A112.18.1-2018 / CSA B125.1-18 California AB100 Compliant Massachusetts Accepted Plumbing Product NSF/ANSI 372 NSF/ANSI 61
Mounting Style	Deck Mounted
Mounting Type	Adjustable
Pre Rinse Unit Type	Hose and Spring
Spray Valve Flow Rate	1.15 GPM
Temperature Rating	180 Degrees F
Thread Size	55/64"-27 UNS
Water Inlet Size	1/2 Inches

Connections

- (2) 1/2" NPT Inlets

Notes & Details

This Waterloo deck-mounted pre-rinse faucet is perfect for rinsing excess food and sauces off of your dishes prior to running them through your commercial dish machine. A quality pre-rinse unit is vital to any dishroom, removing the heaviest soil deposits so that dishes come out clean and ready to use. Waterloo products provide the industry-leading quality you expect. With heavy chrome-plated brass faucet bodies, ceramic cartridges engineered for durability, and certifications from a wide range of national and local regulatory agencies, you can install Waterloo products with confidence. And to give you total peace of mind, this model comes with a 3-year replacement warranty.

A 44" long flexible hose gives you plenty of reach to deliver water where you need it, letting you handle glassware and dinnerware, or bulky items like pots and pans. The spring has a compressed bottom to provide greater durability and help it retain its shape. The spray valve delivers a flow rate of 1.15 GPM, giving you the power needed to blast away food debris while being easy on your water bill. The heavy-duty valve body is designed with a comfort-grip handle and uses metal components for maximum durability and leak protection. This pre-rinse unit also comes with a 12" add-on faucet, for times when you need a normal faucet instead of a spray valve. It is perfect for filling up sink compartments to complete your warewashing tasks. It's also great for mixing up cleaning solutions in sanitation pails.

This faucet uses ceramic cartridges, which provide a much lower fail rate than the compression cartridges widely used in the industry. In this design, 2 ceramic discs fit together to create a watertight seal when closed. This removes the need for a rubber seat washer, which is one of the most frequently replaced parts on a faucet. This is a deck-mounted faucet, and it comes with a single base that makes installation easy. The 1/2" NPT inlet connections, and a set of 20" flex hoses make it easy to connect it to your facility's water lines. This pre-rinse unit comes with an 18" riser.
